The five FUBARs

The USA is a runaway train with a dead man in the engineer's seat. The conductor goes through the cars assuring the passengers that everything is fine. . . never mind the screeching wheels on the curves. . . or the blinding strobe effect of low sunlight passing through the trees out the window at a hundred and forty mph. . . or the bump that made half the stuff in the overhead luggage rack jump out. More people on-board are at tachycardia levels of fright — some are wailing

Subscribe

less than half just remain fixed on their phones and laptop screens. They can't be bothered to look out the window. . . .

James Howard Kunstler | Kunstler.com

Okay, that's a metaphor. But if you're a citizen of our country and care about it, these are the matters you'd better pay attention to, because they are all going off the rails:

The war in Ukraine. We started it in 2014 to mess with Russia and Russia is going to finish it. Who knows what our real motives were. A resource grab? A desperate ploy to erase our national debt by creating a global fiasco? Sheer psychopathic hatred of this Putin fellow? We can't bring ourselves to acknowledge the failure of this ill-conceived venture. Instead, our feckless allies in Europe are foolishly rattling their sabers, apparently forgetting that you don't bring a sword to a nuclear missile fight.

Mr. Macron in France affects to offer up his army for slaughter on the blood-soaked plains of Ukraine, just as the Ukrainians offered up a half a million of their young men so that Victoria Nuland could feel good about herself. Mr. Macron is insane, but the society he presides over is collectively insane, so perhaps he represents them well. Similarly, Olaf Scholz in Germany, whose top generals were caught on a leaked recording last week discussing their plan to blow up the Kerch Bridge that connects Crimea to Russia. Do you understand that this would be a direct attack on Russia, an act of War by NATO? And what the obvious consequence would be?

The phantom government of "Joe Biden" is too weak and mindless to join any negotiation. Ukraine and Russia are up to some kind of cross-talk down in Riyadh with Prince MBS. Even Mr. Zelensky went down for a day, though video appears to show him coked-up, sniffing and snarfling, not a good sign. If ever there was a time to end this stupid conflict, it's now, before the Russian election. After that, terms will only be more difficult for Ukraine, up to direct custodial supervision instead of remaining a nation. It was never any of our business (though the Biden family, BlackRock, and the CIA saw fabulous opportunity to profit there).

Next is the border. You saw last year how the blob elite greeted the transfer of illegal immigrants to their happy little island of Martha's Vineyard. (They were not amused by Governor DeSantis's prank, and off-loaded the mutts post-haste.) But that same smug

demographic doesn't care if hundreds of thousands are distributed to the big cities, which are now fiscally destabilized by them to an extreme, probably to bankruptcy.

Of course, that is not the main thing to worry about with what altogether amounts to millions of border-jumpers flooding our land. The main reason to worry is what the blob that invited them here intends for them to do, which, you may suspect, is to unleash mayhem in the streets, malls, stadiums, and upon our infrastructure just in time to derail the election — perhaps even to make war on us right in our homeland. The US government is paying for this whole operation, you understand, funneling our tax money to international cut-out orgs who set up the transfer camps in Panama, and buy the plane tickets for the mutts to cross the ocean, and coordinate with the Mexican cartels to shuttle this horde of mystery people among us to work their juju for the Democratic Party. The pissed-off-ness of the public has passed the red line on this treasonous scam.

A third FUBAR is the lawfare campaign of the Democratic Party and its regime in power against the citizens of this land. This folder includes overt and obvious political prosecutions by DA's and AG's who make election promises to "go after" individuals without such niceties as probable cause. It includes the gigantic new scaffold of inter-agency censorship and propaganda. It includes the psychopathic struggle sessions mandated by "diversity and inclusion" policy. It includes election-rigging directed by the likes of Marc Elias and Norm Eisen, getting states to fiddle laws on voter ID and mail-in ballots. It includes the political protection of rogue groups ranging from looter flash-mobs to Antifa anarchists who bust up things and people and burn buildings down. It includes state officials who peremptorily kick candidates off the ballot. It includes a nakedly biased judiciary, and especially the use of the DC federal district court to punish people extralegally, unjustly, extravagantly, and cruelly. In short, lawfare is the complete perversion of law, and we-the-people are entreated by reprobate officials such as Merrick Garland and Letitia James to accept it.
